

BSc Architecture & Design

A comprehensive academic handbook exploring architectural principles, design methodologies, sustainability, digital technologies, urban planning, and professional practice.

Page 2: Introduction to Architecture

[illegible]

Key Learning Outcomes

- Understand core architectural concepts and design processes.
- Apply sustainable and context-sensitive design strategies.
- Communicate ideas using drawings, models, and digital tools.
- Evaluate architectural solutions from technical and social perspectives.
- Develop professional and ethical awareness within the built environment sector.

Page 3: History of Architecture

[illegible]

Key Learning Outcomes

- Understand core architectural concepts and design processes.
- Apply sustainable and context-sensitive design strategies.
- Communicate ideas using drawings, models, and digital tools.
- Evaluate architectural solutions from technical and social perspectives.
- Develop professional and ethical awareness within the built environment sector.

Page 4: Elements and Principles of Design

[illegible]

Key Learning Outcomes

- Understand core architectural concepts and design processes.
- Apply sustainable and context-sensitive design strategies.
- Communicate ideas using drawings, models, and digital tools.
- Evaluate architectural solutions from technical and social perspectives.
- Develop professional and ethical awareness within the built environment sector.

Page 5: Architectural Drawing and Visualization

[illegible]

Key Learning Outcomes

- Understand core architectural concepts and design processes.
- Apply sustainable and context-sensitive design strategies.
- Communicate ideas using drawings, models, and digital tools.
- Evaluate architectural solutions from technical and social perspectives.
- Develop professional and ethical awareness within the built environment sector.

Page 6: Design Thinking and Creativity

[illegible]

Key Learning Outcomes

- Understand core architectural concepts and design processes.
- Apply sustainable and context-sensitive design strategies.
- Communicate ideas using drawings, models, and digital tools.
- Evaluate architectural solutions from technical and social perspectives.
- Develop professional and ethical awareness within the built environment sector.

Page 7: Building Materials and Construction

[illegible]

Key Learning Outcomes

- Understand core architectural concepts and design processes.
- Apply sustainable and context-sensitive design strategies.
- Communicate ideas using drawings, models, and digital tools.
- Evaluate architectural solutions from technical and social perspectives.
- Develop professional and ethical awareness within the built environment sector.

Page 8: Structural Systems

[illegible]

Key Learning Outcomes

- Understand core architectural concepts and design processes.
- Apply sustainable and context-sensitive design strategies.
- Communicate ideas using drawings, models, and digital tools.
- Evaluate architectural solutions from technical and social perspectives.
- Develop professional and ethical awareness within the built environment sector.

Page 9: Environmental Design

[illegible]

Key Learning Outcomes

- Understand core architectural concepts and design processes.
- Apply sustainable and context-sensitive design strategies.
- Communicate ideas using drawings, models, and digital tools.
- Evaluate architectural solutions from technical and social perspectives.
- Develop professional and ethical awareness within the built environment sector.

Page 10: Sustainable Architecture

[illegible]

Key Learning Outcomes

- Understand core architectural concepts and design processes.
- Apply sustainable and context-sensitive design strategies.
- Communicate ideas using drawings, models, and digital tools.
- Evaluate architectural solutions from technical and social perspectives.
- Develop professional and ethical awareness within the built environment sector.

Page 11: Urban Planning and Development

[illegible]

Key Learning Outcomes

- Understand core architectural concepts and design processes.
- Apply sustainable and context-sensitive design strategies.
- Communicate ideas using drawings, models, and digital tools.
- Evaluate architectural solutions from technical and social perspectives.
- Develop professional and ethical awareness within the built environment sector.

Page 12: Landscape Architecture

[illegible]

Key Learning Outcomes

- Understand core architectural concepts and design processes.
- Apply sustainable and context-sensitive design strategies.
- Communicate ideas using drawings, models, and digital tools.
- Evaluate architectural solutions from technical and social perspectives.
- Develop professional and ethical awareness within the built environment sector.

Page 13: Interior Design Fundamentals

[illegible]

Key Learning Outcomes

- Understand core architectural concepts and design processes.
- Apply sustainable and context-sensitive design strategies.
- Communicate ideas using drawings, models, and digital tools.
- Evaluate architectural solutions from technical and social perspectives.
- Develop professional and ethical awareness within the built environment sector.

Page 14: Digital Modelling and BIM

[illegible]

Key Learning Outcomes

- Understand core architectural concepts and design processes.
- Apply sustainable and context-sensitive design strategies.
- Communicate ideas using drawings, models, and digital tools.
- Evaluate architectural solutions from technical and social perspectives.
- Develop professional and ethical awareness within the built environment sector.

Page 15: Computer-Aided Design

[illegible]

Key Learning Outcomes

- Understand core architectural concepts and design processes.
- Apply sustainable and context-sensitive design strategies.
- Communicate ideas using drawings, models, and digital tools.
- Evaluate architectural solutions from technical and social perspectives.
- Develop professional and ethical awareness within the built environment sector.

Page 16: Building Services

[illegible]

Key Learning Outcomes

- Understand core architectural concepts and design processes.
- Apply sustainable and context-sensitive design strategies.
- Communicate ideas using drawings, models, and digital tools.
- Evaluate architectural solutions from technical and social perspectives.
- Develop professional and ethical awareness within the built environment sector.

Page 17: Construction Technology

[illegible]

Key Learning Outcomes

- Understand core architectural concepts and design processes.
- Apply sustainable and context-sensitive design strategies.
- Communicate ideas using drawings, models, and digital tools.
- Evaluate architectural solutions from technical and social perspectives.
- Develop professional and ethical awareness within the built environment sector.

Page 18: Site Analysis and Planning

Key Learning Outcomes

- Understand core architectural concepts and design processes.
- Apply sustainable and context-sensitive design strategies.
- Communicate ideas using drawings, models, and digital tools.
- Evaluate architectural solutions from technical and social perspectives.
- Develop professional and ethical awareness within the built environment sector.

Page 19: Housing Design

Key Learning Outcomes

- Understand core architectural concepts and design processes.
- Apply sustainable and context-sensitive design strategies.
- Communicate ideas using drawings, models, and digital tools.
- Evaluate architectural solutions from technical and social perspectives.
- Develop professional and ethical awareness within the built environment sector.

Page 20: Commercial Building Design

Key Learning Outcomes

- Understand core architectural concepts and design processes.
- Apply sustainable and context-sensitive design strategies.
- Communicate ideas using drawings, models, and digital tools.
- Evaluate architectural solutions from technical and social perspectives.
- Develop professional and ethical awareness within the built environment sector.

Page 21: Public Space Design

Key Learning Outcomes

- Understand core architectural concepts and design processes.
- Apply sustainable and context-sensitive design strategies.
- Communicate ideas using drawings, models, and digital tools.
- Evaluate architectural solutions from technical and social perspectives.
- Develop professional and ethical awareness within the built environment sector.

Page 22: Accessibility and Inclusive Design

[illegible]

Key Learning Outcomes

- Understand core architectural concepts and design processes.
- Apply sustainable and context-sensitive design strategies.
- Communicate ideas using drawings, models, and digital tools.
- Evaluate architectural solutions from technical and social perspectives.
- Develop professional and ethical awareness within the built environment sector.

Page 23: Building Regulations and Codes

[illegible]

Key Learning Outcomes

- Understand core architectural concepts and design processes.
- Apply sustainable and context-sensitive design strategies.
- Communicate ideas using drawings, models, and digital tools.
- Evaluate architectural solutions from technical and social perspectives.
- Develop professional and ethical awareness within the built environment sector.

Page 24: Project Management

[illegible]

Key Learning Outcomes

- Understand core architectural concepts and design processes.
- Apply sustainable and context-sensitive design strategies.
- Communicate ideas using drawings, models, and digital tools.
- Evaluate architectural solutions from technical and social perspectives.
- Develop professional and ethical awareness within the built environment sector.

Page 25: Research Methods

[illegible]

Key Learning Outcomes

- Understand core architectural concepts and design processes.
- Apply sustainable and context-sensitive design strategies.
- Communicate ideas using drawings, models, and digital tools.
- Evaluate architectural solutions from technical and social perspectives.
- Develop professional and ethical awareness within the built environment sector.

Page 26: Professional Ethics

[illegible]

Key Learning Outcomes

- Understand core architectural concepts and design processes.
- Apply sustainable and context-sensitive design strategies.
- Communicate ideas using drawings, models, and digital tools.
- Evaluate architectural solutions from technical and social perspectives.
- Develop professional and ethical awareness within the built environment sector.

Page 27: Introduction to Architecture

[illegible]

Key Learning Outcomes

- Understand core architectural concepts and design processes.
- Apply sustainable and context-sensitive design strategies.
- Communicate ideas using drawings, models, and digital tools.
- Evaluate architectural solutions from technical and social perspectives.
- Develop professional and ethical awareness within the built environment sector.

Page 28: History of Architecture

[illegible]

Key Learning Outcomes

- Understand core architectural concepts and design processes.
- Apply sustainable and context-sensitive design strategies.
- Communicate ideas using drawings, models, and digital tools.
- Evaluate architectural solutions from technical and social perspectives.
- Develop professional and ethical awareness within the built environment sector.

Page 29: Elements and Principles of Design

[illegible]

Key Learning Outcomes

- Understand core architectural concepts and design processes.
- Apply sustainable and context-sensitive design strategies.
- Communicate ideas using drawings, models, and digital tools.
- Evaluate architectural solutions from technical and social perspectives.
- Develop professional and ethical awareness within the built environment sector.

Page 30: Architectural Drawing and Visualization

[illegible]

Key Learning Outcomes

- Understand core architectural concepts and design processes.
- Apply sustainable and context-sensitive design strategies.
- Communicate ideas using drawings, models, and digital tools.
- Evaluate architectural solutions from technical and social perspectives.
- Develop professional and ethical awareness within the built environment sector.

Page 31: Design Thinking and Creativity

[illegible]

Key Learning Outcomes

- Understand core architectural concepts and design processes.
- Apply sustainable and context-sensitive design strategies.
- Communicate ideas using drawings, models, and digital tools.
- Evaluate architectural solutions from technical and social perspectives.
- Develop professional and ethical awareness within the built environment sector.

Page 32: Building Materials and Construction

[illegible]

Key Learning Outcomes

- Understand core architectural concepts and design processes.
- Apply sustainable and context-sensitive design strategies.
- Communicate ideas using drawings, models, and digital tools.
- Evaluate architectural solutions from technical and social perspectives.
- Develop professional and ethical awareness within the built environment sector.

Page 33: Structural Systems

[illegible]

Key Learning Outcomes

- Understand core architectural concepts and design processes.
- Apply sustainable and context-sensitive design strategies.
- Communicate ideas using drawings, models, and digital tools.
- Evaluate architectural solutions from technical and social perspectives.
- Develop professional and ethical awareness within the built environment sector.

Page 34: Environmental Design

[illegible]

Key Learning Outcomes

- Understand core architectural concepts and design processes.
- Apply sustainable and context-sensitive design strategies.
- Communicate ideas using drawings, models, and digital tools.
- Evaluate architectural solutions from technical and social perspectives.
- Develop professional and ethical awareness within the built environment sector.

Page 35: Sustainable Architecture

[illegible]

Key Learning Outcomes

- Understand core architectural concepts and design processes.
- Apply sustainable and context-sensitive design strategies.
- Communicate ideas using drawings, models, and digital tools.
- Evaluate architectural solutions from technical and social perspectives.
- Develop professional and ethical awareness within the built environment sector.

Page 36: Urban Planning and Development

[illegible]

Key Learning Outcomes

- Understand core architectural concepts and design processes.
- Apply sustainable and context-sensitive design strategies.
- Communicate ideas using drawings, models, and digital tools.
- Evaluate architectural solutions from technical and social perspectives.
- Develop professional and ethical awareness within the built environment sector.

Page 37: Landscape Architecture

[illegible]

Key Learning Outcomes

- Understand core architectural concepts and design processes.
- Apply sustainable and context-sensitive design strategies.
- Communicate ideas using drawings, models, and digital tools.
- Evaluate architectural solutions from technical and social perspectives.
- Develop professional and ethical awareness within the built environment sector.

Page 38: Interior Design Fundamentals

[illegible]

Key Learning Outcomes

- Understand core architectural concepts and design processes.
- Apply sustainable and context-sensitive design strategies.
- Communicate ideas using drawings, models, and digital tools.
- Evaluate architectural solutions from technical and social perspectives.
- Develop professional and ethical awareness within the built environment sector.

Page 39: Digital Modelling and BIM

[illegible]

Key Learning Outcomes

- Understand core architectural concepts and design processes.
- Apply sustainable and context-sensitive design strategies.
- Communicate ideas using drawings, models, and digital tools.
- Evaluate architectural solutions from technical and social perspectives.
- Develop professional and ethical awareness within the built environment sector.

Page 40: Computer-Aided Design

[illegible]

Key Learning Outcomes

- Understand core architectural concepts and design processes.
- Apply sustainable and context-sensitive design strategies.
- Communicate ideas using drawings, models, and digital tools.
- Evaluate architectural solutions from technical and social perspectives.
- Develop professional and ethical awareness within the built environment sector.

Page 41: Building Services

[illegible]

Key Learning Outcomes

- Understand core architectural concepts and design processes.
- Apply sustainable and context-sensitive design strategies.
- Communicate ideas using drawings, models, and digital tools.
- Evaluate architectural solutions from technical and social perspectives.
- Develop professional and ethical awareness within the built environment sector.

Page 42: Construction Technology

[illegible]

Key Learning Outcomes

- Understand core architectural concepts and design processes.
- Apply sustainable and context-sensitive design strategies.
- Communicate ideas using drawings, models, and digital tools.
- Evaluate architectural solutions from technical and social perspectives.
- Develop professional and ethical awareness within the built environment sector.

Page 43: Site Analysis and Planning

[illegible]

Key Learning Outcomes

- Understand core architectural concepts and design processes.
- Apply sustainable and context-sensitive design strategies.
- Communicate ideas using drawings, models, and digital tools.
- Evaluate architectural solutions from technical and social perspectives.
- Develop professional and ethical awareness within the built environment sector.

Page 44: Housing Design

[illegible]

Key Learning Outcomes

- Understand core architectural concepts and design processes.
- Apply sustainable and context-sensitive design strategies.
- Communicate ideas using drawings, models, and digital tools.
- Evaluate architectural solutions from technical and social perspectives.
- Develop professional and ethical awareness within the built environment sector.

Page 45: Commercial Building Design

[illegible]

Key Learning Outcomes

- Understand core architectural concepts and design processes.
- Apply sustainable and context-sensitive design strategies.
- Communicate ideas using drawings, models, and digital tools.
- Evaluate architectural solutions from technical and social perspectives.
- Develop professional and ethical awareness within the built environment sector.

Page 46: Public Space Design

[illegible]

Key Learning Outcomes

- Understand core architectural concepts and design processes.
- Apply sustainable and context-sensitive design strategies.
- Communicate ideas using drawings, models, and digital tools.
- Evaluate architectural solutions from technical and social perspectives.
- Develop professional and ethical awareness within the built environment sector.

Page 47: Accessibility and Inclusive Design

[illegible]

Key Learning Outcomes

- Understand core architectural concepts and design processes.
- Apply sustainable and context-sensitive design strategies.
- Communicate ideas using drawings, models, and digital tools.
- Evaluate architectural solutions from technical and social perspectives.
- Develop professional and ethical awareness within the built environment sector.

Page 48: Building Regulations and Codes

[illegible]

Key Learning Outcomes

- Understand core architectural concepts and design processes.
- Apply sustainable and context-sensitive design strategies.
- Communicate ideas using drawings, models, and digital tools.
- Evaluate architectural solutions from technical and social perspectives.
- Develop professional and ethical awareness within the built environment sector.

Page 49: Project Management

[illegible]

Key Learning Outcomes

- Understand core architectural concepts and design processes.
- Apply sustainable and context-sensitive design strategies.
- Communicate ideas using drawings, models, and digital tools.
- Evaluate architectural solutions from technical and social perspectives.
- Develop professional and ethical awareness within the built environment sector.

Page 50: Research Methods

Key Learning Outcomes

- Understand core architectural concepts and design processes.
- Apply sustainable and context-sensitive design strategies.
- Communicate ideas using drawings, models, and digital tools.
- Evaluate architectural solutions from technical and social perspectives.
- Develop professional and ethical awareness within the built environment sector.
